Learn to Code with Ruby

- Ruby is an **object-oriented programming (OOP) language**. OOP describes a *category* of languages.
- In Ruby, **everything is an object**.

- We'll be writing our code in VSCode, a popular open-source text editor.
- Ruby files have a **.rb** file extension. We can run our files using Code Runner in VSCode or from our command-line application (Terminal/PowerShell).
- Interactive Ruby (IRB) is a playground where we can experiment with Ruby code.
